

Notice to Foresters and Loggers

To all persons involved with a logging operation in the Town of Alstead:
Please follow "Best Management Practices for Forestry: Protecting New Hampshire's Water Quality" found in the U.N.H. Cooperative Extension document, 2005
<https://extension.unh.edu/resource/best-management-practices-forestry-protecting-new-hampshires-water-quality>

New Hampshire Best Management Practices for Erosion Control on Timber Harvesting Operations, 2016
<https://extension.unh.edu/resource/new-hampshire-best-management-practices-erosion-control-timber-harvesting-operations>

Please protect Alstead's water quality by using good site planning, erosion control, and closing out the site correctly. Erosion control is key: on slopes, stream crossings,

Get your logs, get your value, and, most importantly, treat the land with respect. Alstead wants clean water, vibrant wetlands, and well-managed forests. Stay with Best Management Practices.
